

The Edward

Picton, Ontario

For Brian Clark, Architect

PACE
DESIGN

THE EDWARD BUILDING
PICTON, ONTARIO

Located on Picton's historic commercial artery, this five-storey mixed-use condominium was designed to reflect the style of the former building on the site, which was destroyed by fire more than a decade ago. Stone arches and cornices surrounded by Ontario red brick and accented by wrought iron railings wrap the pedestrian side of the building. The upper two floors step back, respecting the streetscape while resulting in the creation of large terraces overlooking Picton Harbour to the east.

AREA 4,703 sm
BUDGET \$ 9 Million
STATUS Completed 2009
