

Bridle Path House Toronto, ON

Bridle Path

The Client asked us to convert this mock art-deco storey-and-a-half house into a two-storey Mediterranean style house for his extended family. The second storey scissor-truss roof was built over the existing house as a weather-tight structure before removing the old roof. Overall, this work added 1500 sf with the addition of two new bedrooms, a den, a 2-storey glazed link and a large family room over the existing garage.

AREA 5,300 sf
BUDGET Withheld
STATUS Completed 2004
